

Health Professionals:

Custom Fit is an independently owned health club designed in a fashion that is conducive to meeting most health or fitness needs while maintaining a highly welcoming environment. Generally speaking, guided exercise is the focus. Services include personal training, group fitness, chiropractic care, massage therapy, sport performance, martial arts and an exclusive fitness center. The facility includes a private office, a spatial general purpose room with rubberized flooring, and a fully functional fitness center that includes a line of Life Fitness cardio and strength machines to an assortment of free weights, balls, bands, balance, and other alternative training equipment.

While an initial description might paint a different picture, Custom Fit is "small-town" and has a community like feel. Our members and clients are loyal and a part of the family. They know that their goals are truly as important to us as they are to them, and that we'd do anything in our power for them. We take the time; we know about them, their kids, their grand children...What keeps them coming back is that they know when they do, they will be greeted with a genuine smile.

Custom Fit is a separate entity within Energym Sports Campus and shares the benefits of a communal approach to business with Sylvan Learning Center, Prometric Testing Services, Hair Productions, Energym Gymnastics and Cheerleading, Iddy Bidy Pool School, Studio M Dance Company, BabyKids and Hidden Grounds Coffee. These businesses work together by providing diverse services while maintaining a common goal to better those they have the pleasure to serve.

Currently, Custom Fit is in the market to build a team of entrepreneurial health professionals. This team currently includes a chiropractor, massage therapist, post rehab specialist, personal trainers and fitness instructors. To the team, we are looking to work with (but not limited to) additional personal trainers/fitness instructors, massage therapists, physical therapists, and other health professionals from different realms who share a similar philosophy and desire to build a business around it.

This position is ideal for someone who has dreams of running their own business. This opportunity eliminates common expenses such as start-up, overhead, utilities, and the phrase "going out of business." Similar to a hairstylist renting a chair in a salon, one would have a place to develop their own clientele at their own pace with a compensation (rent) to Custom Fit based strictly on production. Through individual efforts, a team of non-competitive health professionals can benefit from one another as Custom Fit and those affiliated with Energym Sports Campus collectively does.

Special note for personal trainers...With a growing business, there is a surplus of clients to trainers at Custom Fit. In addition to independent development, this would allow you to further develop your clientele by being available to pick up those who seek personal training through Custom Fit who otherwise could not be accommodated.

Please do not hesitate to e-mail me with any questions regarding this opportunity: CustomFit@CWFit.com.
